

Polyram® DF

Fungicide

A proven broad spectrum multi-site protectant fungicide for use in a range of horticulture and broadacre crops.

Formulated with zinc (14%), **Polyram DF** from BASF gives a superior crop finish with a proven reduction in russetting of fruit and increased product quality.

Polyram DF is a protectant fungicide which stops fungal cells penetrating and affecting the plants surface; within the fungal cell amino acid production is interrupted, stopping the cells continued growth.

Polyram DF is also a soft and safe option for use in selected Integrated Pest Management (IPM) programs with a strong beneficial insect safety profile.

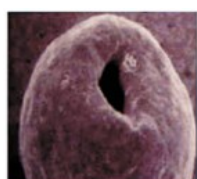

For improved usability Polyram contains a flowable hollow granule with beneficial properties including:

Improved handling through less dusting.

No anti-foaming agent required.

Formulation stays in suspension longer allowing use flexibility.

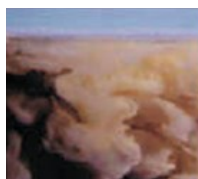

Polyram DF dissolves quickly and completely.

Hollow-granule formulation
