

Vivando®

Fungicide

For the prevention and strong residual control of powdery mildew in grapes.

Vivando® with a unique mode of action, has contact and vapour activity resulting in improved coverage of foliage and fruit, even in tight clusters. Vivando protects crops for up to 14 days.

Vivando is rainfast in one hour, ensuring long lasting protection and complete plant coverage as part of a preventative fungicide program for application before powdery mildew disease symptoms occur.

Benefits

- New Group U8 Fungicide.
- Preventative spray for powdery mildew control.
- Stops infection process through inhibiting penetration of spores into the plant tissue.
- Vivando slows growth and development of existing powdery mildew infections whilst limiting lesions and powdery mildew sporulation.
- Vivando has a strong affinity with the plant waxy cuticle which drives improved coverage and product redistribution.
- Vivando offers excellent bunch protection through vapour action and increases surface coverage.
- Suspension Concentrate (SC) formulation type for improved tank mixing.
- Rainfast in one hour.
